

Attachment for Toyota Forklift

Toyota Forklift Attachments - Ever since 1992, Toyota Material Handling inc., U.S.A., often known as TMHU, have been the top selling lift truck supplier in the United States. This business has been based out of Irvine, California for well over 40 years, providing a comprehensive line of quality lift trucks. With a great reputation of resilience and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the keystone of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S.A are manufactured here.

All Toyota's manufacturing plants within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its commitment to continual improvement and its environmentally friendly systems. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift vehicles emit 70% fewer smog forming emissions than the current federal EPA standards and have complied with California's strict emission standards and policies.

TMHU, U.S.A.- Leading the Industry

The president of Toyota Material Handling, U.S.A., Brett Wood believes that TMHU's achievement comes from its commitment to construct high quality lift vehicles at the same time as providing exceptional client assistance and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." • TMHU's parent company, Toyota Industries Corporation, also referred to as TICO, is listed in Fortune Magazine as the world's principal lift truck dealer and is amongst the magazines impressive World's Most Admired Companies.

Redefining Environmental Responsibility

Toyota Industries Corporation, as the parent company, has instilled a rich company doctrine of environmental stewardship in Toyota. Not a lot of other companies and no other lift truck manufacturer can equal Toyota's history of protecting the natural environment while concurrently encouraging the economy. Environmental accountability is a key feature of company decision making at Toyota and they are proud to be the first and only maker to offer UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet another reason they remain a leader within the industry.

In 2006, Toyota released the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission values, and also meets California's more involved 2010 emission standards. The finished invention is a lift truck that creates 70 percent fewer smog forming emissions than the existing Federal standards tolerate.

Furthermore in 2006, Toyota developed an affiliation with the Arbor Day Foundation, furthering their commitment to the environment. More than 57,000 trees have been planted in district parks and national forests damaged by environmental reasons such as fires, as a product of this partnership. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's system of dealers to non-profit organizations and neighborhood consumers to help sustain communities all over the United States

Industry Leader in Safety

Toyota's lift trucks offer superior strength, visibility, output, ergonomics, and all the foremost safety technology that has made Toyota an industry leader. The company's System of Active Stability, often known as "SAS"•, helps reduce the risk of incidents and accidental injuries, and increasing productivity levels while minimizing the likelihood of product and equipment breakage.

System Active Stability senses numerous factors that could lead to lateral insecurity and likely lateral overturn. When any of those factors are detected, SAS instantly engages the Swing Lock Cylinder to stabilize the rear axle. This transitions the lift truck's stability trajectory from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the probability of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to avoid injuries or accidents while adding strength.

The SAS systems were initially used on the 7-Series internal combustion lift vehicles which were put on the market in 1999. These systems helped push Toyota into the lead for industry safety standards. Now, SAS is utilized on virtually every modern internal combustion models and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in operation, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with obligatory worker education, overturn fatalities across all models have decreased by 13.6% since 1999. Also, there have been an overall 35.5% drop in industry wide collisions, loss of control, falls and tip overs from a lift vehicle for the same period.

Toyota's pattern of brilliance reaches far beyond its technological achievements. The company maintains a widespread Operator Safety Training program to help customers meet OSHA standard 1910.178. Training packages, video lessons and various materials, covering a broad scope of matters-from individual safety, to OSHA policies, to surface and load conditions, are offered through the vendor network.

Toyota's Dedication to The U.S.A.

Since the sale of its first lift truck in the U.S. to the fabrication of its 350,000th lift truck produced in 2009 at Toyota Industrial

Equipment Manufacturing, [Toyota parts](#) has continued a unbroken presence in the U.S. This reality is demonstrated by the statistic that 99% of Toyota lift trucks sold in America at the moment are built in the United States.

Based in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities spanning 126 acres. Facilities include a National Customer Center, as well as manufacturing operations and supply centers for equipment and service components, with the total investment exceeding \$113 million dollars.

The modern NCC was designed to function for TMHU clients and dealers. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an section for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its creator, Sakichi Toyoda, in 1867, and lastly a instruction center.

Leader in Customer Service and Satisfaction

TMHU has 68 official industrial equipment dealers, along with 189 dealership locations all through the United States, offering the most complete and inclusive client support and customer service in the industry. The company's new and Certified Used lift vehicles, service, parts, and financing features make Toyota dealerships a one-stop shop to guarantee overall consumer satisfaction.
